at&t

*Caller ID displays a caller's name, number, time and date of the call between the first and second ring. This feature requires the user to subscribe to Caller Identification service, available through their local telephone company. Caller ID may not be available in all areas and a fee may be associated with this service. To ensure optimal utilization of this feature, both the user's telephone and the telephone of the calling party must be in areas where Caller ID services are available, and the local telephone company must be using compatible equipment as well. Use of all features listed under "Caller ID/Call Waiting Features" or any features referencing Caller ID/Call Waiting require a subscription(s) to services provided through the local telephone company.

**Use of Voicemail Waiting feature requires a subscription to voicemail services available through your local telephone company.

***The actual recording time depends on individual message characteristics.

****Visit www.telephones.att.com for a complete list of cell phones that have been tested and found compatible with the AT&T TL86109 and TL92271.

*****Use of Auto Reset feature requires a subscription to Caller ID services available through your local telephone company.

******When on a conference call, under certain configurations and/or situations, the far-end parties may not be able to hear one another clearly even when the volume is adjusted to its highest level.
